GENERAL INFORMATION:
APPLICANT ALEXANDROV, Nickolai et al.
TITLE OF INVENTION: SEQUENCE-DETERMINED DNA FRAGMENTS AND CORRESPONDING POLYPEPTIDES
TITLE OF INVENTION: THEREBY
TITLE OF INVENTION: THEREBY
TITLE OF INVENTION: THEREBY
CURRENT APPLICATION NUMBER: US/09/620,393B
CURRENT APPLICATION NUMBER: US/09/620,393B
SOFTWARE: PATENTING DATE: 2000-07-21
NUMBER OF SEQ ID NOS: 9948
SOFTWARE: PATENTIN VETSION 3.0
SEQ ID NO 7088
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                APPLICANT: Salemme, F. Raymond
APPLICANT: Carver, Jr., Theodore, E.
TITLE OF INVENTION: High Throughput Method for Functionally Classifying Proteins
TITLE OF INVENTION: Identified Using a Genomics Approach
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            .:
